The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 888-233-4339 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the fund (if any) is based on returns of an older share class, which have been adjusted for expenses.

Bonds and bond funds are subject to interest rate risk, credit risk and inflation risk. Interest rate risk means that the value of bonds and bond funds generally falls when interest rates rise, causing an investor to lose money upon sale or redemption. Equity funds, unlike bond funds, invest in equity securities, which include common stock, preferred stock and convertible securities. Because such securities represent ownership in a corporation, they tend to be more volatile than fixed income or debt securities, which do not represent ownership.

*The net expense ratio reflects the expense ratio of the fund after applicable expense waivers or reimbursements, if any.
