

# Transamerica Asset Allc Moderate A

**Investment Style:**

Moderate Allocation

**Investment Objective:**

Asset Allocation

**Investment Strategy:**

The investment seeks capital appreciation and current income. The fund normally invests in a diversified combination of underlying Transamerica fund's. It normally expects to adjust the investments in underlying funds with a mix over time of approximately 50% of assets in equities and 50% of assets in fixed income which may include bonds, cash, cash equivalents, or other money market instruments. The fund may also invest directly in U.S. government securities and/or short-term commercial paper.

**Fund Family:**

Transamerica

**Inception Date:**

3/1/2002

**Ticker Symbol:**

IMOAX

*Because excessive transactions can disrupt the managing of a fund and increase the fund's cost for all shareholders, the fund may place certain limits on exchanges and other transactions. Please refer to the fund's prospectus for complete information.*

**Growth of \$100 (Since Inception)**

The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 888-233-4339 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the fund (if any) is based on returns of an older share class, which have been adjusted for expenses.

Any US Government guarantees of the securities held in this investment fund only pertain to those securities and not the Fund or its yield. Bonds and bond funds are subject to interest rate risk, credit risk and inflation risk. Interest rate risk means that the value of bonds and bond funds generally falls when interest rates rise, causing an investor to lose money upon sale or redemption. Equity funds, unlike bond funds, invest in equity securities, which include common stock, preferred stock and convertible securities. Because such securities represent ownership in a corporation, they tend to be more volatile than fixed income or debt securities, which do not represent ownership.

\*The net expense ratio reflects the expense ratio of the fund after applicable expense waivers or reimbursements, if any.

**Annualized Returns (%) as of 09/30/10**
