

Vanguard Small Cap Index

Investment Style:

Small Blend

Investment Objective:

Small Company

Investment Strategy:

The investment seeks to track the performance of a benchmark index that measures the investment return of small capitalization stocks. The fund employs a passive management investment approach designed to track the performance of the MSCI US Small Cap 1750 index, a broadly diversified index of the stocks of smaller U.S. companies. It attempts to replicate the target index by investing all, or substantially all, of assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Fund Family:

Vanguard

Inception Date:

10/3/1960

Ticker Symbol:

NAESX

Because excessive transactions can disrupt the managing of a fund and increase the fund's cost for all shareholders, the fund may place certain limits on exchanges and other transactions. Please refer to the fund's prospectus for complete information.

Growth of \$100 (Since Inception)

The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 800-662-7447 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the fund (if any) is based on returns of an older share class, which have been adjusted for expenses.

The securities of small and medium-sized companies, because of the issuers' lower market capitalization, may be more volatile than those of large-sized companies.

*The net expense ratio reflects the expense ratio of the fund after applicable expense waivers or reimbursements, if any.
