

T. Rowe Price Small-Cap Stock

Investment Style:

Small Blend

Investment Objective:

Small Company

Investment Strategy:

The investment seeks to provide long-term capital growth. The fund will normally invest at least 80% of assets in stocks of small companies. The holdings will be widely diversified by industry and company. Under most circumstances, it will invest less than 1.5% of assets in any single company. While the fund invests most assets in U.S. common stocks, it may also purchase other securities including foreign stocks, futures, and options.

Fund Family:

T. Rowe Price

Inception Date:

6/1/1956

Growth of \$100 (Since Inception)

The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 800-638-5660 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the fund (if any) is based on returns of an older share class, which have been adjusted for expenses.

The securities of small and medium-sized companies, because of the issuers' lower market capitalization, may be more volatile than those of large-sized companies. Foreign securities and markets pose different and possibly greater risks than those customarily associated with domestic securities, including currency fluctuations and political instability. Investments in derivatives may subject the fund to greater volatility than investments in traditional securities.

*The net expense ratio reflects the expense ratio of the fund after applicable expense waivers or reimbursements, if any.
