

Vanguard 500 Index Investor

Investment Style:

Large Blend

Investment Objective:

Growth and Income

Investment Strategy:

The investment seeks to track the performance of a benchmark index that measures the investment return of large-capitalization stocks. The fund employs a passive management investment approach designed to track the performance of the Standard & Poor's 500 index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. It invests all, or substantially all, of assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Fund Family:

Vanguard

Inception Date:

8/31/1976

The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 800-662-7447 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the fund (if any) is based on returns of an older share class, which have been adjusted for expenses.

Equity funds, unlike bond funds, invest in equity securities, which include common stock, preferred stock and convertible securities. Because such securities represent ownership in a corporation, they tend to be more volatile than fixed income or debt securities, which do not represent ownership.

*The net expense ratio reflects the expense ratio of the fund after applicable expense waivers or reimbursements, if any.
